

## Ready To Fit Compression Vests

TSL has a range of Ready To Fit Compression Vests available for your clients needs.

Compression vests are suitable for a variety of diagnoses and problems. You may find them suitable for the following situations:-

Burns scar treatment (+/- Si Gel Inserts)

Lymphoedema – Particularly problems with chest wall oedema and/or fluid accumulation around the axilla

Following Liposuction

As a foundation garment to which compression sleeve/s may be added as required e.g. a patient with right arm Lymphoedema and an accumulation of fluid around the axilla may benefit from a vest to waist with a Class 1 Arm sleeve attached.

As a foundation garment to which support may be added to address shoulder stabilization problems.

### The Ready To Fit Vest Range has the following options:

Available in three lengths:

Mini Vest (for women only)

Vest To Waist

Vest To Hip

Class 1

Class 2

Sizing adjustable, enabling a cost effective alternative to a Custom Made Garment.

### Advantages of TSL Ready To Fit Vests

Provide circumferential compression

Flat seams

Open weave nature of Fabric means less heat retention

Laundering ease with garments drying quickly
