TSL has a range of Ready To Fit Compression Vests available for your clients needs.

Compression vests are suitable for a variety of diagnoses and problems.

You may find them suitable for the following situations:-

- Burns scar treatment (+/- Si Gel Inserts)
- Lymphoedema – Particularly problems with chest wall oedema and or fluid accumulation around the axilla following Breast Surgery

As a foundation garment to which compression sleeves may be added.

- Provide circumferential compression
- All seams are flat
- Open weave nature of Fabric, means less heat retention
- Laundering ease with garments drying quickly
- Immediate Availability
- Combination Sizes Available
